

James is a local college student.

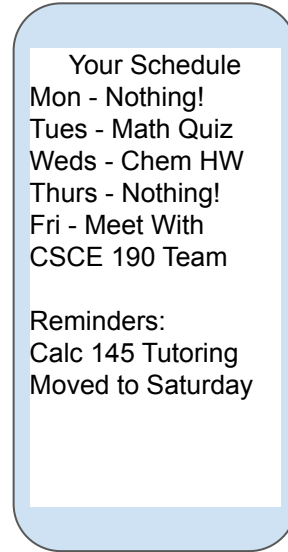

James has trouble keeping up with his work.

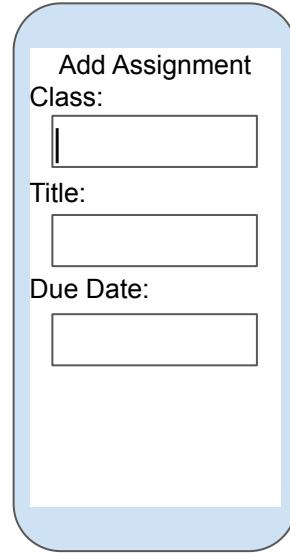

James has trouble keeping up with his work.

James discovered our app to help him manage his work!

Now he has a custom schedule with reminders  
to help him better manage his time!

A light blue rounded rectangle containing a white form titled "Add Assignment". The form has three input fields: "Class:", "Title:", and "Due Date:".

Add Assignment

Class:

Title:

Due Date:

He can add new assignments to his worklist...

The image shows a mobile application interface for adding a class. It is contained within a light blue rounded rectangle. At the top, the text "Add Class" is centered. Below it, the label "Class:" is followed by a text input field. Then, the label "Day:" is followed by another text input field. Next, the label "Start Time:" is followed by a text input field. Finally, the label "End Time:" is followed by a text input field. All input fields are empty and have a light gray background.

Add Class

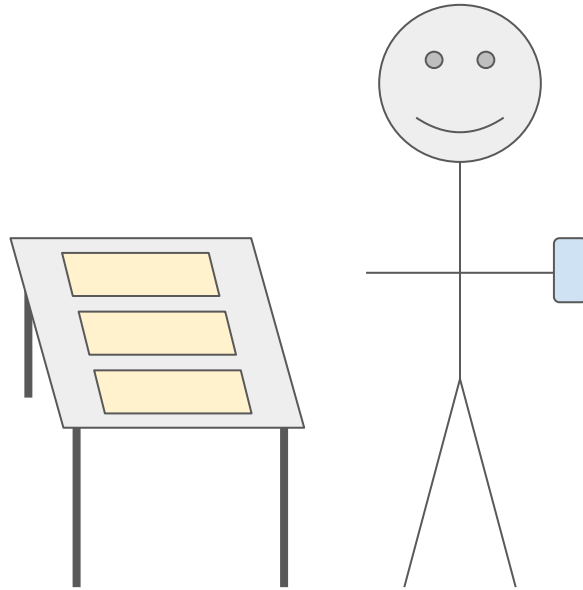

Class:

Day:

Start Time:

End Time:

... and update his schedule with any changes!

Now James is a lot more organized!
